Richard Turner

**Design an Arctic poster to be shown
on the RRS *Sir David Attenborough*!**

The Arctic is home to amazing wild animals like polar bears, whales and walrus. But the places they live are increasingly under threat from things such as shrinking sea ice and man-made pollution. Scientists need to understand more about how the Arctic is changing and what it means for the wildlife, so that the best decisions can be taken about how to protect this fragile environment and all its inhabitants.

If you're between 5 and 15 we'd love you to **design a colourful Arctic poster.**

You could show why it's important for researchers to study the Arctic, or how we can keep the Arctic safe and why it matters, or draw your favourite Arctic animal. The winning posters will be displayed on the RRS *Sir David Attenborough* and at the UK's Arctic Station in Svalbard. Winners will also receive an Arctic-themed goody-bag.

Get involved and submit your posters **by 31st October 2019** to NERC Arctic Office, British Antarctic Survey, High Cross, Madingley Road, Cambridge, CB3 0ET. All competition details, terms and conditions are available at www.arctic.ac.uk
